Sub.- Misuse of water in multiplexes and trains.

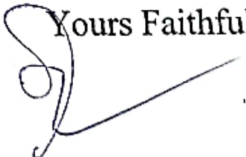

Sir,

I need to apprise you that in most of the multiplexes / shopping malls of the country censor –fit water taps are fixed on the wash basins and urinals. The same has been adopted by the Indian railways in its new passenger coaches.

In this method, a certain amount of water runs at one use. One cannot stopped it . So a huge amount of water is misused.

Kindly instruct all the concerned authority to modify their system, so a responsible citizen can stop the water running use less.

Thanking You

Yours Faithfully

(S.K.Kataria)
