**Subject:** Suggestion

Sir,

I have used your costly product Melbild, which is of Rs.1040 for 5ml solution.

The point is that this product comes in a very small glass vial.

If the vial is fallen from the hands of patient then it is a big loss for him.

Can not you launch this product in a plastic or other container? Please consider the issue with R and D unit.

Regards

S.k.kataria, jaipur
