Dear Team Whatsapp

At the outset I must congratulate you to make communication easy and user-friendly through your worldwide app. One suggestion is that kindly change sequence of Report- Block- Clear chat- Export chat --- in the setting section, Because when a user wants to clear the chat the finger usually goes to below and block option is selected.

My humble suggestion is that BLOCK should be enlisted at near to 'add to list' or 'add shortcut'.

Hope you would think over the practical issue.

Enclosed- snap shot of actual place.

Regards

Surendra Kumar Kataria
